WORK HISTORY

Software Engineer – Contract

02/2025 – Present

Walmart, Sunnyvale, CA

- Developed and enhanced a migrated service within an existing Walmart application using Java, Spring Boot, and Kafka, improving system performance by 15%.
- Designed and implemented an event-driven architecture with Kafka, achieving 99.9% message delivery reliability and reducing processing latency by 20%.
- Provided on-call support for 5+ critical production systems, ensuring rapid issue resolution and maintaining 99.95% system uptime.
- Collaborated with 6+ cross-functional teams and documented over 30 incident reports, driving a 10% improvement in operational efficiency.
- Utilized Git for version control, managing 20+ feature branches, and conducted 15+ peer code reviews to maintain code quality standards.
- Participated in Scrum ceremonies (Daily Stand-ups, Sprint Planning, Retrospectives, and Release Planning) consistently, contributing to 100% sprint delivery targets.

Java Engineer – Contract

10/2023 – 11/2024

American Express, Phoenix, AZ

- Engineered high-performance backend systems using Java 17 and Spring Boot, successfully managing 10M+ daily transactions with industry-leading 99.99% system reliability.
- Actively engaged in agile methodologies, maintaining 90%+ sprint completion by collaboratively transforming stakeholder requirements into high-impact functional solutions.
- Designed Dockerized microservices to reduce deployment times by 55% and improve scalability, while developing CI/CD pipelines with GitHub Actions to achieve 95% endpoint coverage and reduce production defects by 60%.
- Utilized Spring MVC, Security, AOP, and Dependency Injection to enhance code maintain and system performance.
- Established Apache Cassandra for distributed storage, ensuring high-performance data management and seamless scaling.
- Implemented rigorous unit and functional testing using JUnit, achieving 95% test coverage and proactively reducing production defects by 60% through early issue detection and systematic quality assurance.

Full Stack Developer – Full Time

02/2023 – 09/2024

Slesha IT Inc – Irving, TX

- Maintained and improved 3+ Java 11-based backend applications, ensuring consistent scalability and performance across mid-sized deployments.
- Built and integrated 10+ RESTful APIs to streamline frontend-backend communication, contributing to a 15% faster feature rollout cycle.
- Performed Angular development for frontend modules, enhancing 5+ user-facing features and improving overall user experience.
- Optimized SQL queries and database interactions, achieving a 10–15% improvement in data retrieval efficiency and backend response time.

Systems Engineer – Full time

11/2020 – 09/2021

Infosys Ltd, Hyderabad, India

- Developed and deployed 10+ REST APIs and microservices using Java J2EE and Spring Boot, improving application scalability by 25%.
- Implemented microservices architecture with Spring Boot, resulting in a 20% reduction in response time for service.
- Automated 80%+ of functional & regression test suites using Selenium WebDriver, Core Java, Maven, and TestNG.
- Designed and built a hybrid automation framework from scratch, reducing manual testing efforts by 40%.
- Utilized Spring Kafka API to process 1M+ messages daily across a cluster setup, improving real-time data handling.
- Conducted test execution through Git and Jenkins pipelines and generated detailed TestNG reports; managed 50+ defects via JIRA.
- Developed and maintained web services using RESTful and SOAP frameworks, increasing service interoperability by 30%.

SKILLS

- **Programming Languages:** Java, JavaScript, Python, Terraform Scripts, TypeScript
- **Machine Learning & AI:** Supervised & Unsupervised Learning, TensorFlow, PyTorch, scikit-learn, Reinforcement Learning
- **Web:** HTML, CSS, Bootstrap
- **Frameworks:** Angular, React.js, Spring Boot, Spring, Bootstrap
- **Databases:** MySQL, SQL, Oracle, MongoDB, DynamoDB
- **Cloud Platforms:** Azure, AWS
- **Version Control:** GitHub, Bitbucket, Git
- **Tools:** Maven, Gradle, Confluence
- **CI/CD:** Docker, Kubernetes, Jenkins
- **Messaging Systems:** Kafka
- **Monitoring & Logging:** Splunk, Grafana
- **Testing Tools:** JUnit, Mockito

EDUCATION

Master of Science: Computer Science	08/2021 - 12/2022
University of Missouri - Kansas City - Kansas City, MO	GPA: 3.7/4.0
Bachelor of Technology: Computer Science	06/2016 - 04/2020
KL University – Guntur, India.	GPA: 3.5/4.0

ACHIEVEMENTS & EXTRA CURRICULAR ACTIVITIES

Member of the Indian Student Organization at UMKC	2021 - 2022
Captain of student club SAMYAK, KL University	2019 - 2020
University Advisory Student Board Member, National Service Scheme	2018 - 2019
Member of Social Engineering Associates
